

# Rumba architecture

## Physical Infrastructure

- 1 DELL 7920

## Network

Rumba is located in an isolated separate network inside the school. It can be accessed via a [Wireguard VPN](#) (ask Rémi for access).

Inside this network you have a simple setup :

```
192.168.88.0/24 : Network appliances subnet
192.168.89.0/24 : VPN subnet
192.168.92.0/24 : Server's IDRACs subnet
192.168.93.0/24 : Servers subnet
192.168.94.0/24 : LXC containers subnet

192.168.92.1 : Server's IDRACs gateway
192.168.93.1 : Servers gateway
192.168.94.1 : Containers gateway on the bridge br0
```

There is currently 1 physical server in it :

```
192.168.92.10 : Rumba1 IDRAC
192.168.93.10 : Rumba1 host
```

## Software Architecture

### User accounts

User access is SSH based for now, managed by Rémi.

### LXC Containers

There a few services running now :

- Reverse Proxy (Nginx)
- ISC Inventory (Snipe-IT)
- Backup of the ISC Learn Platform, for testing and disaster recovery (Moodle)
